SKILLS

Languages:	C, C++, Java, JavaScript, TypeScript, SQL
Frontend:	HTML5, CSS3, React.js, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs (API Design & Development), JWT Authentication
Databases:	PostgreSQL, MySQL, MongoDB
Tools/Platforms:	Git, GitHub, Vercel, Neon, Render, VS Code, MongoDB Atlas
Core Concepts:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Soft Skills:	Analytical Thinking, Problem Solving, Adaptability

EXPERIENCE

Web Development & Designing Intern | Oasis Infobyte | [GitHub](#) | [Live Demo](#) Sep 2026 – Oct 2026

- Developed a full-stack pizza ordering and inventory management web application using React.js, Node.js, Express.js, and MongoDB, featuring separate user and admin workflows.
- Designed, built and secured REST APIs with JWT authentication, pizza customization, order management, Razorpay test-mode payments, real-time order tracking, and role-based access control.
- Built an admin inventory management system with automatic stock deduction, manual stock updates, configurable low-stock alerts, and automated email notifications. Tested and debugged core workflows before deployment.

PROJECTS

SmartShop | Full-Stack AI-Powered E-Commerce Platform | [GitHub](#) | [Live Demo](#) Sep 2026

- Developed a full-stack e-commerce platform integrating 8+ core features, including role-based authentication, product search and filtering, persistent cart and wishlist, coupons, order tracking, and an admin analytics dashboard.
- Implemented secure checkout with Razorpay payment integration, HMAC-SHA256 signature verification, JWT authentication, and atomic inventory updates to maintain transaction and stock consistency.
- Built a hybrid AI product recommendation engine using Google Gemini API and PostgreSQL-based ranking with deterministic fallback, supporting personalized and related-product recommendations.

SkillForge AI | AI-Powered Career & Productivity Platform | [GitHub](#) | [Live Demo](#) Aug 2026

- Developed a full-stack AI career and productivity platform integrating 6+ AI-powered tools, including ATS resume analysis, career roadmaps, study planning, mock interviews, code assistance, and content generation.
- Implemented AI-powered document intelligence supporting 3 file formats (PDF, DOCX, and TXT) with contextual Q&A using Google Gemini 1.5 Flash.
- Built secure JWT authentication, PostgreSQL data management with Prisma ORM, and project/task management with Kanban and calendar views; deployed the frontend on Vercel and backend on Render.

TRAINING

Data Structures & Algorithms Jun 2026 – Jul 2026

Centre for Professional Enhancement, Lovely Professional University

- Covered complexity analysis, arrays, linked lists, stacks, queues, trees, recursion, heaps, hashing, and graph algorithms, with hands-on implementation of core algorithms.
- Grade: A

CERTIFICATIONS

- Database Management System Part 1 | Infosys Springboard
- Programming Using C++ | Infosys Springboard
- Introduction to DSA with Proctored Exam | Coding Tantra

EDUCATION

Lovely Professional University Bachelor of Technology in Computer Science and Engineering; CGPA: 8.53	Phagwara, Punjab Aug 2024 – Present
ST. Mary's School Class XII (Intermediate): Percentage: 82.2%	Kashipur, Uttarakhand Mar 2023 – May 2024
ST. Mary's School Class X (Secondary School): Percentage: 87.2%	Kashipur, Uttarakhand Mar 2021 – May 2022
